

## 2019 No-Cost ACA Preventive Drug List

### Background

The Affordable Care Act (ACA) mandates that certain groups and individual health plans must provide coverage for Preventive services with no member cost share when filled at an in-network Pharmacy.

The following list was compiled using guidance from the IRS guidelines (Notice 2004-23\*\*) for certain type of health plans and the Affordable Care Act (ACA) which denote that certain medications are considered Preventive for the conditions they treat. It is important to note that this list is not inclusive of all conditions and may change at any time. This list combines both the ACA mandated categories, along with certain other conditions and treatment as identified by the IRS guidelines which are Preventive in nature. The list reflects very commonly prescribed medications to treat very common conditions generally treated within primary care.

Other rules, specific criteria, exclusions, and limitations may apply to all categories (i.e. Quantity Limit, Age, and Gender).

Drug Class	Condition	Medication
